SureLOK™ MIS 3L

PERCUTANEOUS SCREW SYSTEM

SIMPLE & EFFICIENT

The SureLOK™ *MIS 3L* is a low profile, percutaneous screw system. The system features an extended tab tulip with 20mm of controlled rod reduction. The screw has a triple lead, proximally tapered thread that greatly enhances delivery. This reduces fatigue and minimizes OR time without compromising screw purchase. In addition, the open tulip design, 30° of rod angulation and bulleted rod tip eases rod insertion. The system also offers multiple sleeve options to allow for aggressive tulip manipulation, rod reduction and compression and distraction techniques.

SureLOK™ MIS 3L PERCUTANEOUS PEDICLE SCREW

150mm Integrated Extension Tab features a low profile outer diameter (13.7mm) allowing for a smaller incision to minimize muscle disruption

Open Tab Design provides maximum visualization and eases rod placement

Polyaxial Screws offer 30° of angulation in all planes for intraoperative flexibility

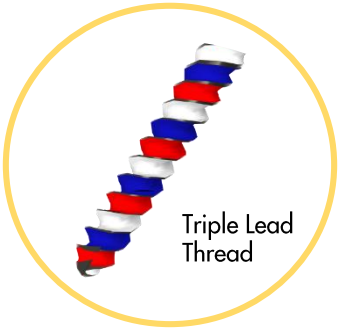
Integrated Reduction Threads provide 20mm of controlled rod reduction

Break-Off Tab removal is completed in one easy step

Triple Lead Thread allows for efficient screw delivery

Aggressive Self Tapping Screw Tip optimizes screw engagement

Curved & Straight Rod's bulleted tip and keyed hex end provide a rigid connection while the 15° rod inserter angle eases rod insertion and release



Center and Side Load Rod Inserters meet varying surgical techniques and provides a strong rod interface for secure insertion

Side Load Inserter

Streamlined Insertion Instrumentation provides OR efficiency while minimizing soft tissue disruption:

- **Dilation/Awl/Tap** is completed in one step

- **Modular Rings & Sleeves** provide maximum rigidity

- **Internal Rod Reducer** allows for 50mm of controlled rod reduction

- **Compressor/Distractor** is powerful, precise and effective
